

Horse Trailer

The art of trailer

In a class of it's own

Whether it is Flat Racing, Endurance, Show Jumping, Dressage and Polo or be it any other Equine Sport, you will find a 'Thiel' trailer that perfectly suits your requirement. The reason; there is a 'Thiel' trailer designed and manufactured to suit every horse or every horsemen's requirement.

From 'Pico Royal' and 'Deluxe' for the cost conscious to 'MEXX' for the most discerning, 'Thiel' has plenty of options to cater to every horseman's choice; and they all come with plenty of options in accessories to choose from.

As the industry trend setter, 'Thiel' philosophy is to implement technical innovations, comfort and functionality thereby ensuring top driving safety for horses. Whether it is the 'AluPlast' aluminum plastic composite floor or the ALKO Framework Suspension, it is this 'Thiel' philosophy that keeps us ahead of competition. Plenty of options in

accessories do give us the opportunity to customize each trailer to suit the requirement of our esteemed clients.

Our branch at Dortmund is not only a sales and distribution facility but is also a full-fledged service unit where all repair and maintenance works

are done professionally while maintaining comprehensive stock of spare parts and accessories; here our experienced staff presents the complete pallet of the horse-friendly 'Thiel' Trailers with plenty of sophisticated accessories enabling the desiring to visualize the trailer of their choice. Along with Horse Trailers, we also offer a great variety of commercial trailers for individual and industrial use.

Specifications

Why Thiel?

Thiel Horse Trailers are easily distinguishable by their better finish and creative designs.

Thiel name is synonymous with superior quality, excellent workmanship and broad experience in polyester manufacturing does reflect in Thiel Horse Trailers.

Being a major manufacturer of Polyester, Thiel trailers are almost completely designed and manufactured at our plant in Pfullendorf. Mould design and making, polyester and metal processing and the entire assembling and finishing touches are all done at our plant. This concentration of most of the manufacturing process not only saves costs but also reflects in the quality.

All Thiel horse trailers have 'AluPlast' floor; aluminum-plastic composite floor with special primer to prevent oxidation. This floor construction ensures that you never have to worry about rotten floor!

This floor is finished with a high quality rubber mat, fully glued and sealed around the edges.

In addition, Thiel trailers are finished with stainless steel fasteners and provided with rubber gaskets and plates.

Unique to all Thiel trailers is the standard rubber finish and grease nipples on the tailgate hinges. So there is no chance of manure between the hinges and hinges remain stainless and smooth functioning.

No doubt, Thiel Trailer owners can rest assured of years of comfort and safety for their horses in transportation.

AL-KO SAFETY AXLE SYSTEM

The solid and durable AL-KO chassis gives 'Thiel' trailers a stable basis for horse transport. Most advanced components with the highest specification in the industry ensure best possible protection for horses while travelling in 'Thiel' Horse Trailers.

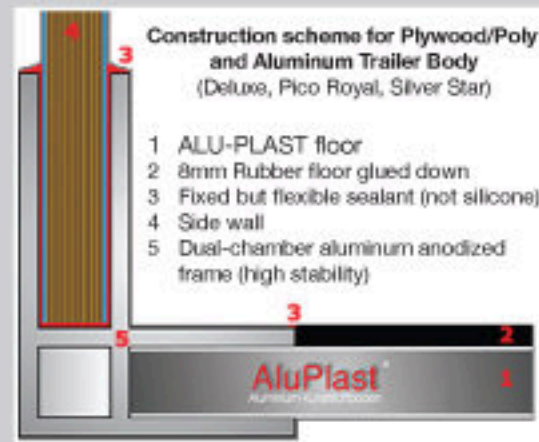

Suspension: AL-KO's soft hexagonal rubber suspension provides the best possible protection for your horse's joints. The perfect axle system for transporting horses with large deflection for more driving comfort. The AL-KO hexagonal outer tube and triangular inner tube provide significant deflection for gentle transport.

Shock Absorber: The AL-KO Octagon shock absorber can be tailored for any horse trailer. These shock-absorbers with optimal adjustment to specific weight of the particular trailer provides for very smooth operation and comfort.

Low Maintenance: Maintenance-free spring system, minimal tyre wear, brake drums with improved heat conduction because of specially designed cooling fins, robust, durable and reinforced axle stubs, screwed steel-frame construction, optimal corrosion protection by hot-dip galvanizing and above all very easy to maintain as each components are designed to complement each other for optimal safety.

Overrun Device: The control unit for the automatic overrunning system. Once a certain threshold is reached, it transfers the thrust to the brake rod through a bell crank which in turn activates the wheel brakes with a Bowden cable. AL-KO braking system overrun devices far outstrip the legal requirements in brake tests.

Specifications

Full Polyester Horse Trailer

(Compact, Domino HT, Domino HT Ultra, Explorer Comfort, Explorer Ultra, Mikado, Pico, Pico Ultra, Sinus, Sinus Aluminum)

Poly / Plywood & Aluminum Horse Trailer

(De Luxe, Pico Royal, Silver Star)

Trailer for Mare & Foal (1½ Horses)

PICO

Pico Why draw more than what is necessary? – if it is just a horse or mare and a foal, then the 1 ½- horse all-polyester Pico is the right option. Maximum comfort and reliability characterize the compact light weight trailer. When only small horses are to be transported, Pico offers a clever solution with center partition.

Trailer for 3 to 4 Horses

MEXX FOR 3 – 4 HORSES

MEXX - this name stands for exclusive design, elegance and security. A spacious 3 horse trailer with high quality materials combined with modern chassis technology and an extensive range of equipment. The chassis offers a combination of comfort, sportiness and safety. The MEXX has telescopically adjustable dividers, the horses travel in their most comfortable position: backwards.

MEXX has a specially designed spacious tack room. The tack room is accessible from the outside through 2 large doors (left and right) and also features a large door to the horse compartment.

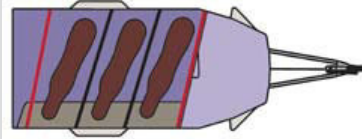

The most important feature of MEXX is the flexibility to convert the trailer in to a 4-horse trailer. Being pioneers as manufacturer of polyester structure and with in-house manufacturing and fixing of most components, Thiel has the flexibility to make changes in the interior.

Dimensions (in mm)

Total Length outside	: 5980	Wall Height	: 1600
Total Length inside	: 4600	Length of Tailgate	: 1600
Overall Width outside	: 2340	Tack Room Door	: 1410x750
Overall Width inside	: 2050	Service Door	: 1420x750
Total Height outside	: 2850	Front Exit	: Yes
Overall Height inside	: 2360	Empty Weight	: 1350-1830kg
Gross Weight	: 3000/3500kg		

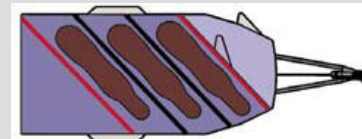

Variation 1, western version:

3 Horses diagonally with a large walk-in tack room and additional storage space in the right side wall. The entrance is on the right; behind the left door is the swing-out saddle rack.

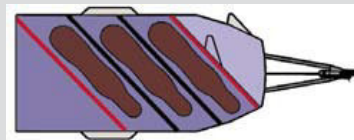

Variation 2:

3 Horses diagonally with a small tack room with fixed saddle carriers. Choice of left or right configuration.

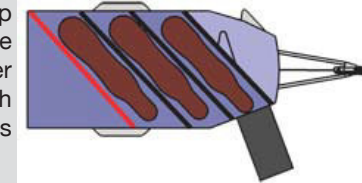

Variation 3: for great performance horses:

This variation has room for 3 large horses. The tack room is smaller and it does not swing out but includes saddle stands. Choice of left or right configuration.

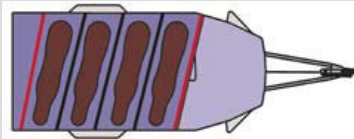

Variation 4 three horses with tack room & front ramp:

This version has a custom partition, tack room and tailgate / front ramp on the right front. The tack room is smaller but offers enough room for 3 saddles and extra stuff.

Variation 5: for 4 small horses or ponies:

Largely identical to variation 1, but with additional telescopic divider for 4th horse / pony; additional storage not available in this variation.
